Haifa KHIARI

Full-Stack Developer (React / Next.js, Node.js)

Sousse, Tunisia | +216 55 182 078 | haifa.khiari@outlook.fr

LinkedIn: https://www.linkedin.com/in/haifa-khiari/

Portfolio: https://haifa-portfolio/ **GitHub**: https://github.com/haifa17

Full-Stack Developer with **2+ years of experience** building **production-ready, high-performance web applications** using **React and Next.js and Node.js.**Strong focus on **UI/UX implementation**, **performance optimization**, **SEO**, and **scalable frontend architecture** Experienced in designing and developing end-to-end features, from intuitive user interfaces to robust backend APIs. Comfortable working in **remote, cross-functional teams.**

TECHNICAL SKILLS

Frontend: React.js, Next.js, JavaScript (ES6+), TypeScript
Backend: Node.js, Express.js, RESTful APIs
State & Data: React Query, Zustand
Databases: MySQL, PostgreSQL, MongoDB
Performance & Architecture: SSR, SSG, ISR, Code Splitting, SEO Optimization
UI & Styling: Tailwind CSS, CSS, Framer Motion, GSAP
Authentication: NextAuth, Clerk
Tools: Git, GitHub, Jira, Trello

PROFESSIONAL EXPERIENCE

Full-Stack Developer (Frontend Focus)

Visioad – Sousse, Tunisia. | **09/2023 – Present**

- Built and maintained **production-level web applications** using **React.js and Next.js**, including an **e-commerce dashboard and store interface**.
- Implemented **secure authentication and role-based access control** using **NextAuth and Clerk** (admin, vendor, customer roles).
- Improved **performance and SEO** through **SSR, SSG, ISR**, image optimization, and efficient routing strategies.
- Managed server state and caching using **React Query**, and global state with **Zustand**, improving data consistency and UX.
- Developed **interactive UI animations** with **Framer Motion and GSAP**, increasing user engagement.
- Integrated **internationalization (i18n)** using **next-intl** for multilingual applications.
- Applied **code splitting, React Suspense, and dynamic imports** to optimize loading times.
- Collaborated with designers and developers via **Git workflows and code reviews**, ensuring clean, maintainable code.

Full-Stack Developer Intern – End of Studies Project

ENOVA ROBOTICS, Tunisia | **02/2023 – 05/2023**

- Developed a web and desktop application for remote robot monitoring and diagnostics.
- Built a responsive frontend using React.js for real-time visualization and control.
- Developed RESTful APIs using Node.js and Express for device communication
- Integrated MySQL to store diagnostic and monitoring data.
- Used MQTT protocol for efficient real-time data exchange with robots.

EDUCATION

- **National Engineering Diploma – Computer Engineering**
  ISITCOM Hammam Sousse, Tunisia — *06/2023*
- **Applied License – Computer Networks**
  ISITCOM Hammam Sousse, Tunisia — *06/2020*
